Introduction

Welcome to Axe Hacks

We are so excited to have you join us for our first ever Axe Hacks! Our hackathon aims to provide a beginner-friendly, low-stress environment for female and non-binary students to explore computer science topics and tools while working on a team to create a project..

Everything you will need this weekend can be found on our website and on Devpost. This guide will also have resources that may help you with the creation of your project this weekend and how to participate. Throughout the hackathon, you will also have access to resources and mentors to help you along the way.

Note: This hackathon is meant to be fun and we request that everyone joining us follows our rules and regulations, and report anyone who does not. If at anytime you need to reach out to us, please do not hesitate to use the contact information provided in the Code of Conduct section of our rules and regulations.

What is a Hackathon

A hackathon is a place for collaboration in a short amount of time to create a project, or "hack," that solves a problem. Organizations and companies will put together hackathons to bring people together to work rapidly in a short period of time to implement their ideas or start creating prototypes. These projects can be submitted to the hackathon to compete for awards and prizes, typically on Devpost. Check out all our Axe Hacks Prize Categories here!

Hackathons usually take place over a weekend and last 24-36 hours. Hackathons are more than just creating a project, you are taken on a journey where you explore and learn new concepts alongside teammates to make your project as viable as you can.

But don't worry, you are not required to code a whole application in a weekend! The goal of a hackathon is to show off your idea in any state it is and prototype it to the best of your ability in a short amount of time. You can always continue to develop your idea after the hackathon. One example of a hackathon project that became successful is GroupMe, pretty awesome right!? Read more about hackathons here!

📋 Hacker Checklist

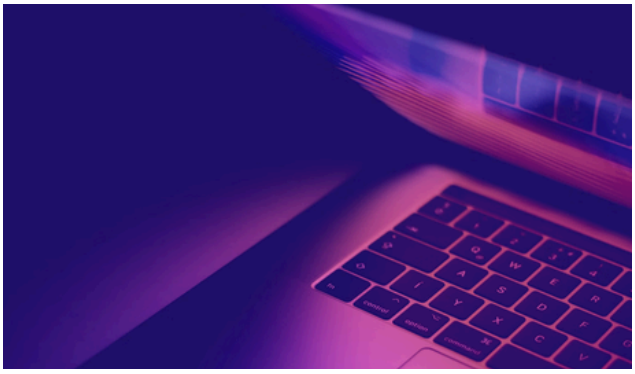

Let's make sure you're fully registered, on our Discord, have the necessary technology, and are ready to get hacking!

SIGN UP/ JOIN US

- [ ] [Link] Register for Axe Hacks
- [ ] [Link] Sign Up for a Devpost Account
- [ ] [Link] Register for Axe Hacks on Devpost
- [ ] *Join our Discord server
- [ ] [Link] Add our Calendar to Yours

**Check the emails you have received after registering for this link.*

REQUIRED ITEMS

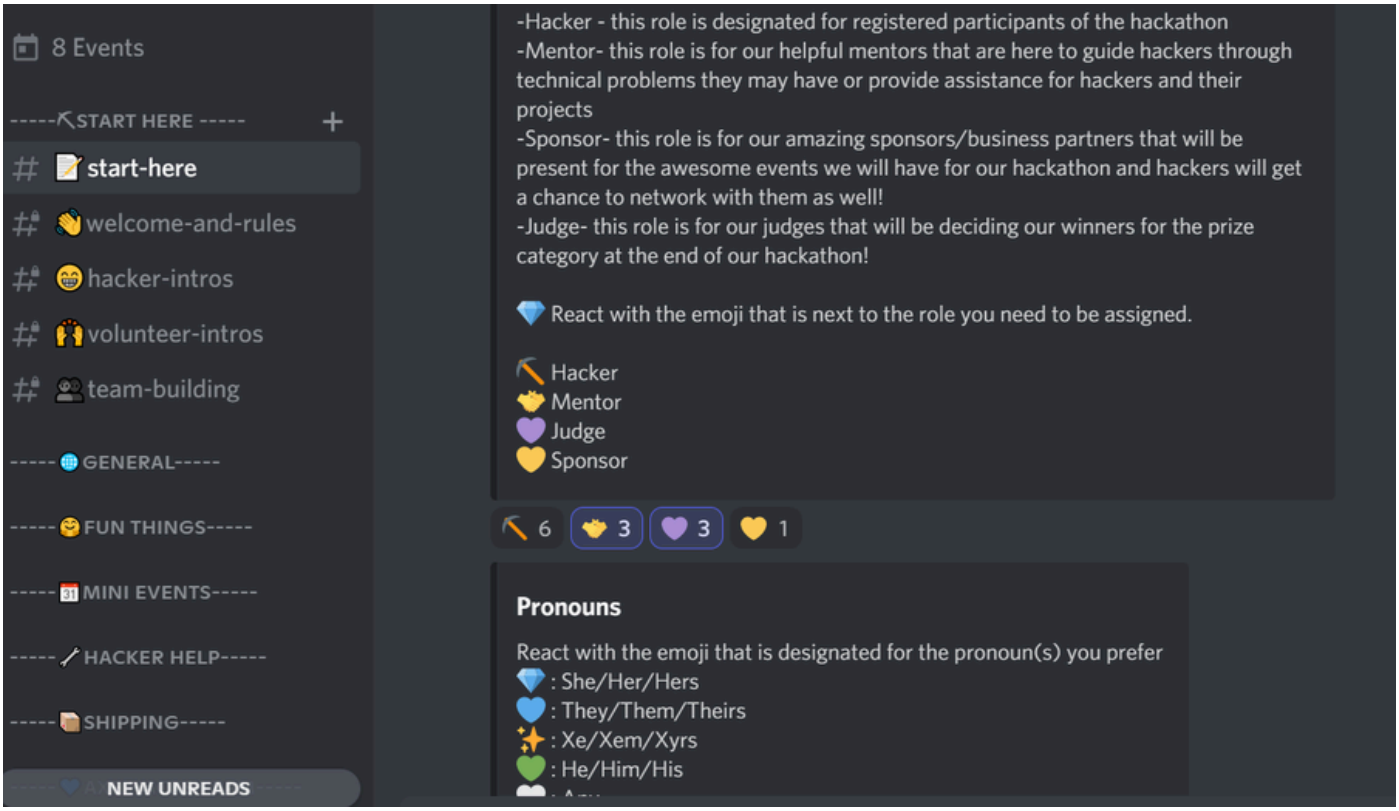

- [ ] Laptop/Computer
- [ ] Internet Connection
- [ ] "Can do" Spirit!

How to use Discord

Make sure to join our discord server! **Discord will our primary method of communication during this event for all attendees**. Attendees will be able to ask questions and get tech support from mentors as well. If you do not have a Discord account yet, please create one first. Once you have an account, use the link to join our Discord found in an email from Axe Hacks you received after registering. Then you can find more on how to use our Discord below!

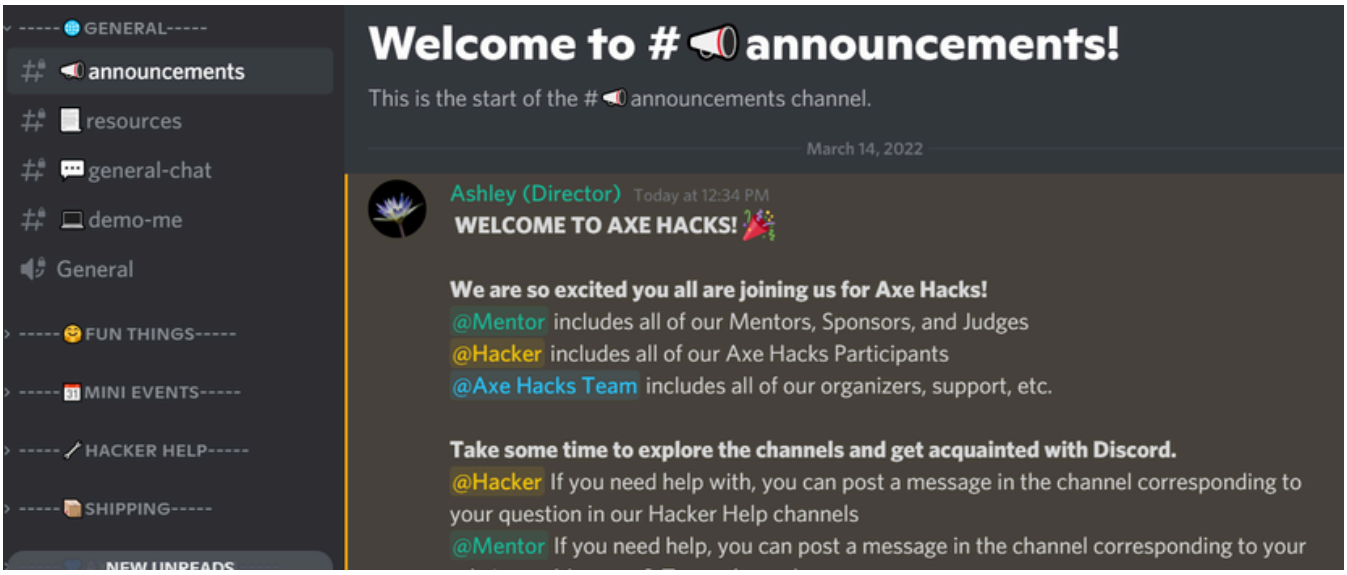

🏁 Getting Started

When you first join the Discord server, you will only have access to a few channels. To get access to the rest of the server, please follow the steps found in the **# 🚦 start-here** channel. Make sure to click on the reactions (emojis) to assign yourself pronouns and get the hacker role. **This will allow you to see the rest of the discord.**

📢 Announcements

#📢announcements: This channel is the most important one to keep an eye on during Axe Hacks! This is where the Axe Hacks team will send out important updates and reminders, so make sure you check this channel regularly or have your notifications on.

🙋 Help Channels

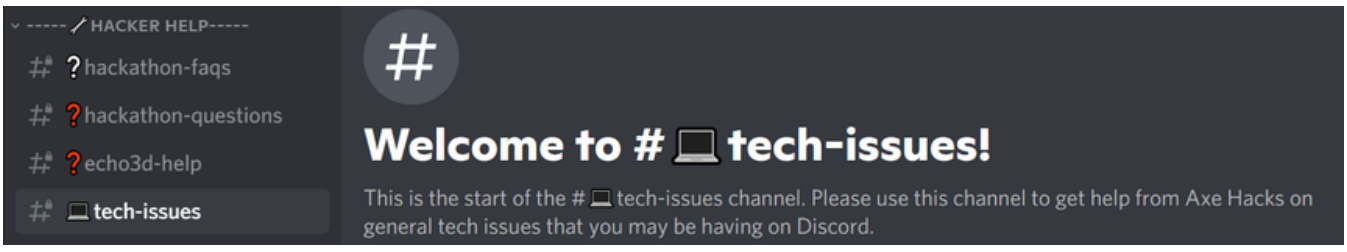

❔ hackathon-faqs: Check the FAQs in this channel first to see if your question has already been answered.

❓ hackathon-questions: Use this channel to get answers to logistical questions regarding Axe Hacks and its events.

❓ echo3d-questions: Use this to get support using echo3D from their very own rep!

#💻tech-issues: Use this channel to request help from a mentor for technical or logistical questions with your project. Be sure to include specifics on the problem (see instructions at the beginning of that channel). The mentor on shift with knowledge relating to your problem will reach out and ask you to join the Hacker Help Zoom Link (**#📚resources** channel).

#📖discord-tips: Use this channel to learn more about discord settings and usage in general.

💬 General Channels

#📝start-here: Use this channel to self-assign roles to display your pronouns, what you're interested in working on, get access to event/workshop-specific Discord channels, and get access to in-person announcements

#👋welcome-and-rules: Here you can see a brief overview of our Discord rules.

#😄hacker-intros: Introduce yourself and meet other hackers!

#🙌volunteer-intros: Meet our mentors, sponsors, and judges!

#👥team-building: If you're looking for teammates, introduce yourself in the #team-building channel and see who else is looking for teammates!

#📚resources: Check this channel for our zoom links, hacker guide, and other useful things!

#💬general-chat: This channel is for starting random conversations with anyone on the server!

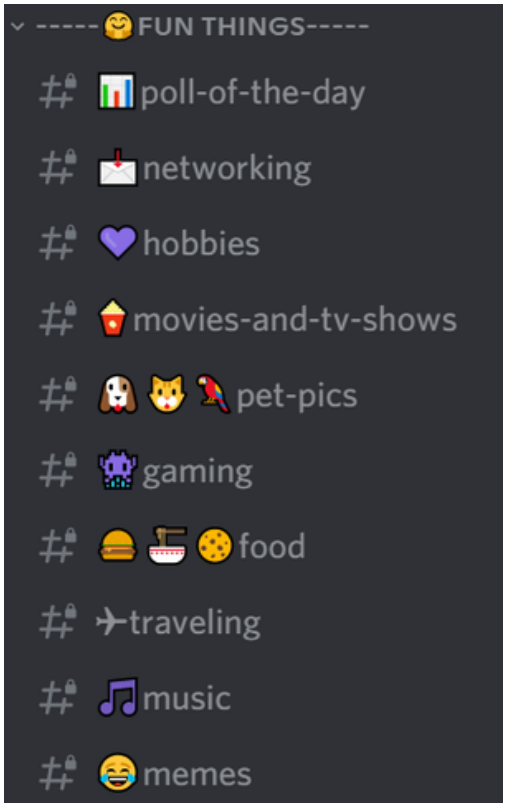

#💻demo-me: When you're all done hacking and want your project demo video shown at the Closing Ceremony, drop your team name and Devpost submission link in this channel!

😎 Other Channels

#📩networking: Drop your LinkedIn, GitHub, personal website, and other professional links to grow your network.

Take a look at some of our other channels like **#💜hobbies** and **#🍔food** to chat about special interests. These can be found under Fun Things.

Check out our Shipping channels for info on, or to ask questions relating to, prizes and packages.

📍 Virtual vs. In-Person Info

💻 Virtual Information

Axe Hacks is primarily virtual. **All official hackathon events will take place on Zoom with the links shared in Discord.** This includes all Mini Events, Hacker Hangouts, and the Opening and Closing ceremonies. Hacker Help will be virtual as well. You can post questions in the help channels mentioned earlier and get 1-on-1 help on the Hacker Help Zoom Link (**#📚resources** channel).

🏢 In-Person Information

Who/What/Where
In-Person gatherings are limited to UNC Charlotte students. Although the events are virtual, participants may choose to meetup in the ACMW Lounge in Woodward on UNC Charlotte's campus. These meetups could be to work on projects, get technical help, hangout, or attend watch parties.

Hacker Help
Though all of our Hacker Help will be available virtually, some of our mentors may be in the lounge and able to help you in-person during their shift.

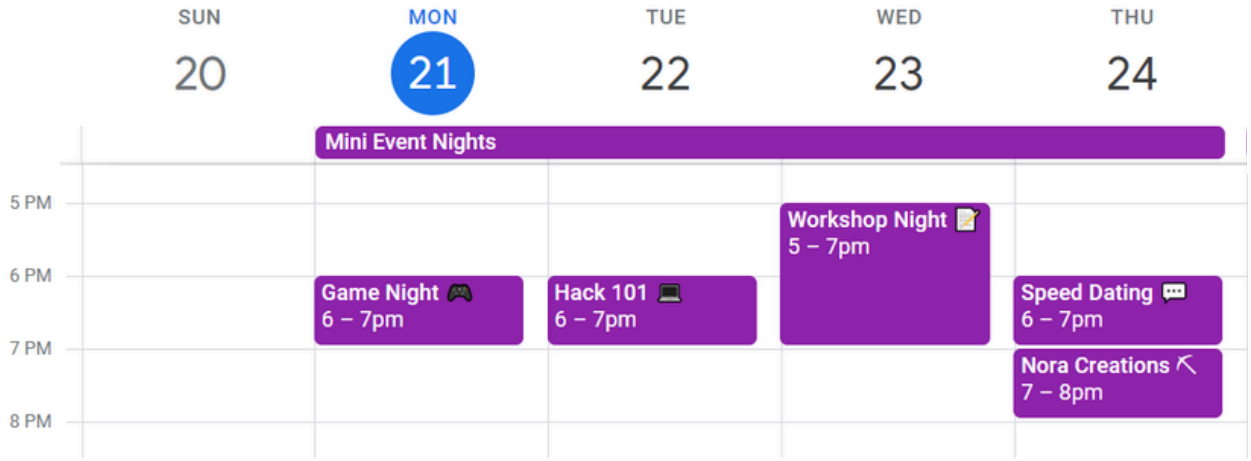

Events
Some of our Axe Hacks Team members will be in the lounge hosting a watch party for the Opening and Closing ceremonies. There will also be some members going to the Hacker Hangouts in-person to eat together at the locations shared in Discord.

Axe Hacks Event Info

Axe Hacks Calendar

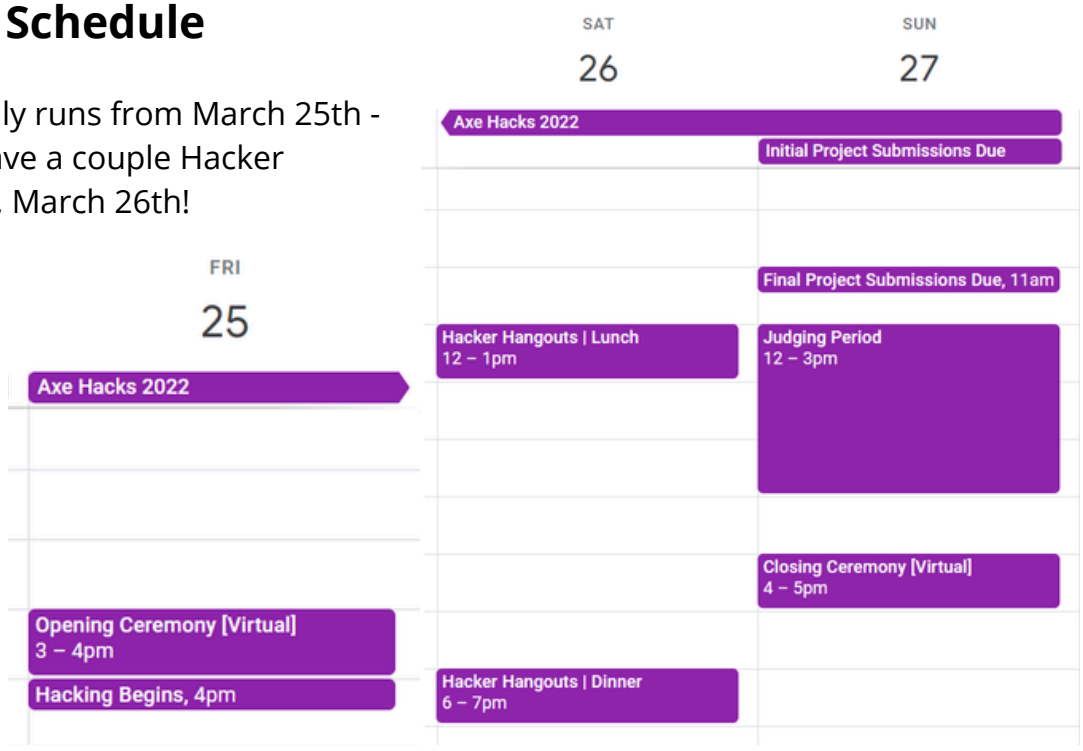

Mini Events Schedule

Our Mini Events are a chance to start meeting mentors and other hackers at Axe Hacks. These are meant to offer a combination of fun bonding events and introductions into hackathons and resources that will be available to you during the hackathon.

Hackathon Schedule

Our Hackathon Officially runs from March 25th - March 27th, and we have a couple Hacker Hangouts on Saturday, March 26th!

How to use Devpost

⚠️ Project Requirements

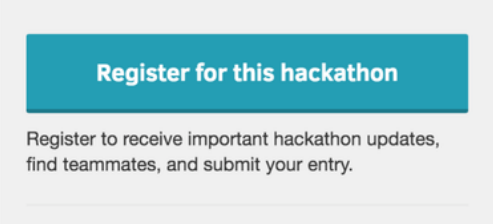

- Must have **2-4 people per team**
- It must be your **original code/work**
  - Boilerplate/template code may be used, but you must cite your source(s)
    - Eligible sources consist of code from open-source tutorials and code given to hackers through sponsor workshops
- All code and/or other materials must have been written or produced **within the time frame of the hacking period**
- Project submission **must include a demo video** *(2 minutes or less)*
- Submit **one** project per team to Devpost

📨 Submitting to Devpost

Submit your hackathon project by 11 AM Sunday, March 27th.
This is how you will be eligible for prizes. Late submissions are not accepted.

For this reason your Intial Devpost Submission is Due at 8 AM Sunday, March 27th.
(You can continue to edit and update your submission until the deadline, but no changes to the submission or any pieces of your project can be edited after the final submission deadline.)

Step 1: Register for Pearl Hacks DevPost
a) Go to the Axe Hacks Devpost page
b) Click “Register for this hackathon”
c) Log in/create account (*Use the same email you did when you registered for Axe Hacks)

Step 2: Enter a submission

a) Click “Enter a submission”

b) Click “Start a project”

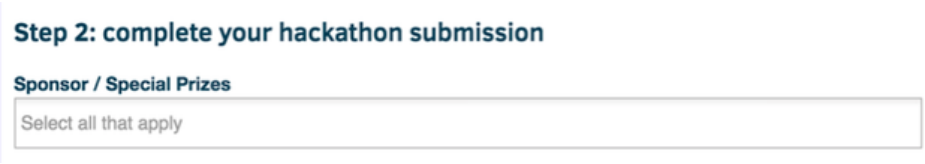

✨ NOTE: All team members should make a DevPost account, but **only one person should submit** a project. Everyone else should be added as a collaborator.

Step 3: Fill out project submission details

a) Fill out your project details (brief is fine), then add your team. Upload a screenshot or photo, include a link to your code and/or other materials somewhere (this part is important!), and click “Save.”

b) Create a demo video that shows off your project and the features you have implemented. You can also talk about what you have learned and what is next for your project. Your team can choose to be in the video or just have a voice-over of your project. Demo videos should be 2 minutes or less! The goal is to summarize your concept and how it works at a high level.

c) Opt-in to any category or sponsor prizes you would like to be considered for in the “Sponsor / Special Prizes” dropdown (see below). You may opt-in to multiple prizes.

NOTE: Every submission is automatically considered for Axe Hack's “Best Overall Hack,” "Best UI/UX" and "Most Popular Hack" awards.

Step 5: Click “submit”!

Technical Resources

***Remember Google and YouTube are great tools for finding resources and tutorials as well!**

Sponsor Resources

echo3D

echo3D is a cloud platform for 3D/AR/VR that provides tools and server-side infrastructure to help developers & companies quickly build and deploy 3D/AR/VR games, apps, and content.

For FREE ACCESS to their business plan use this link:
